

## ABT Security Systems Bringing intelligence to Security

**ABT Security Systems supply integrated security systems for the Corporate, Retail, Education, Health Care, Hospitality, Warehousing, Pharmaceutical, Manufacturing and Transport sectors Australia wide.**

We understand the unique needs and potential threats each industry sector faces with insights gained from over ten years experience on-the-ground.

Our next generation digital security products offer superior surveillance coverage and functionality. Plus, our Multi-Layered Management Software manages multiple security devices on one platform allowing for the timely retrieval of highly targeted information.

### **About ABT Security Systems**

ABT Security Systems is part of the ABT Group, one of Australia's largest suppliers of Retail POS and ERP business information management systems.

The ABT Group established ABT Security Systems to meet growing demand by business to integrate security with core business information management systems.

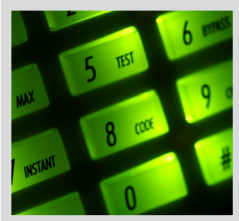

### **Integrating Security with Core Business Systems**

ABT Security Systems see your security system as an adjunct to your companies IT infrastructure. Linking security assets via seamless data exchange to your existing IT system allows for greater efficiencies, more accurate analytics, and a tightening of the broader security net.

In the retail sector our security systems can be integrated with front of house point-of-sale software, alerting you immediately to suspicious transactions, break-ins, or any event criteria you choose to pre-select with our Multi-Layered Management Software.

Plus, you can even have CCTV vision or transactional data sent to your smart phone in real-time, as it happens.

Call us now and discover the possibilities for your business on

# Our Multi-Solution approach:

At ABT Security Systems we offer more than just standalone product installations.

Our Multi-Solution concept offers integrated packages designed to meet your unique requirements.

## ABT Multi-Layered Management Software

### Integrating all your Security Assets

When something goes wrong, you need devices and security management software working together to notify you immediately.

Currently in many organisations security assets such as CCTV, Alarms and Access Control, don't talk to each other. Information is accessed and stored on disparate systems leading to confusion and an indistinct version of events.

ABT Security Systems can integrate all your security assets from CCTV cameras, Alarms to Access Control in one easily viewable platform. What we call Multi-Layered Management Software.

Multi-Layered Management Software collects live vision and data from all your security devices, allowing for easy monitoring, automated alerts, and highly targeted information retrieval.

## ABT Multi-Access

ABT Multi-Access Control Systems offer intelligent networked solutions suitable for small business to global multinationals.

Our comprehensive Management and Monitoring Software allows seamless integration with Alarm, CCTV and other IP devices, with live video and event associated playback controlled from one platform.

### Our Multi-Access Control Systems include:

- Swipe Card
- Biometrics
- Facial Recognition
- People Counting
- Licence Plate Recognition (LPR)
- Remote Monitoring

## ABT Multi-Alarm

A well designed alarm system lies at the heart of effective security management. Using world's best technology we design and install systems to suit your specific needs.

Our alarm systems can be hard wired, wireless or a combination of both.

We pride ourselves on the care we take during installation to ensure your new system delivers maximum operational functionality from day one. You'll find our high client satisfaction rate attests to our care and experience.

### Our Multi-Alarm Systems include:

- Infra Red
- Thermal
- Microwave
- Seismic
- Magnetic
- Visual
- Remote Monitoring

## Regular Security System Health Checks

**As an ABT Security Systems client we won't set and forget about you.**

Part of our service and duty of care is to ensure your system is working 24x7 with regular maintenance and service visits. If you or your staff have any concerns or questions please ask one of our friendly crew visiting on-site, or call our emergency 24x7 hotline on **1300 658 871**

## ABT Multi-View

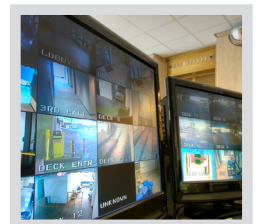

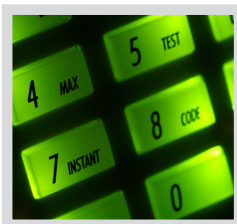

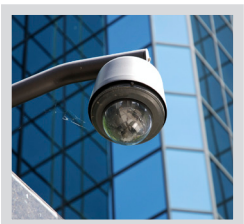

With more special features, integration versatility, streamlined operational performance and management efficiency, ABT Multi-View cameras really do represent the very latest world leading technology. These high tech advantages also convert to low cost installation and unlimited connectivity options.

Our cameras process video, audio and data from local and multi-site locations, and are all easily viewed and managed from one platform.

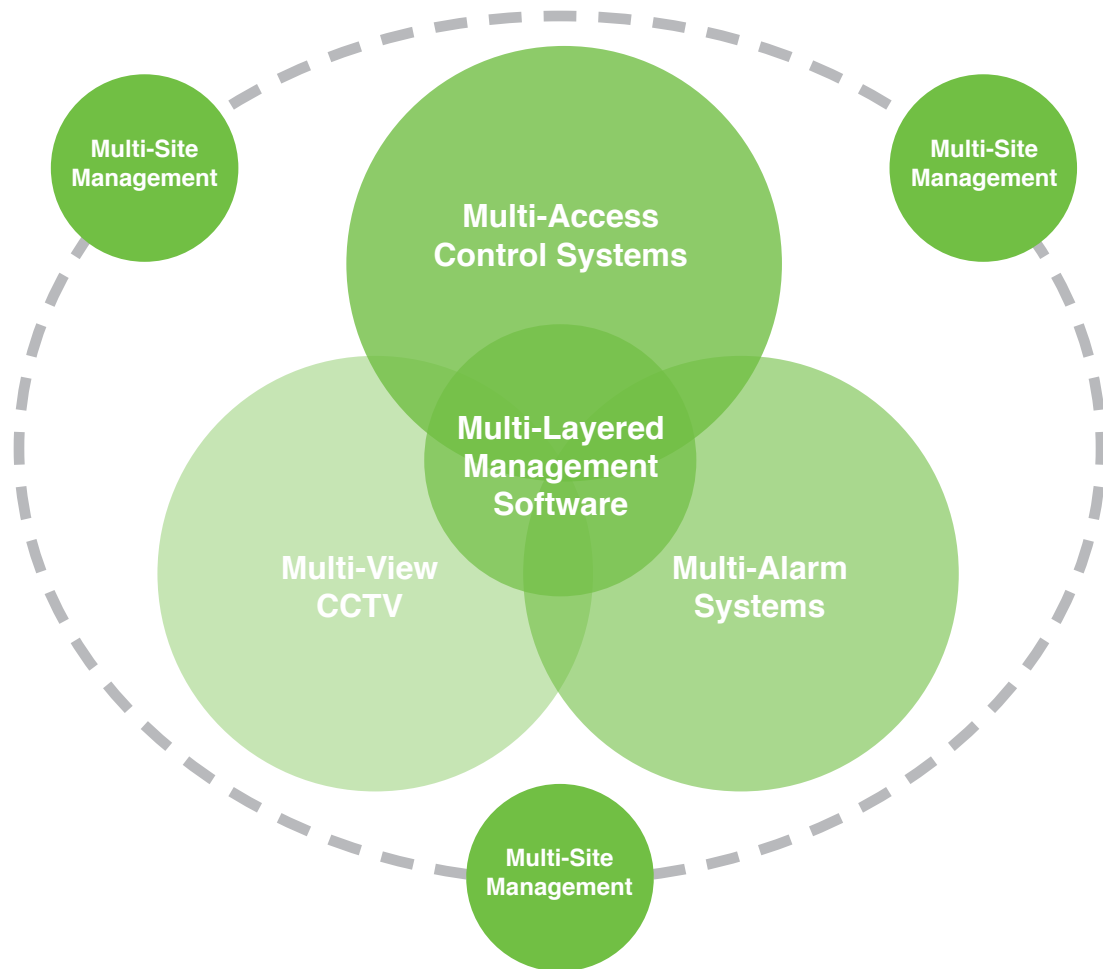

With so many features, we're sure our Multi-View cameras will fulfill even the most demanding client requirements.

### Our Multi-View CCTV Systems include:

- 360 Multi-view
- Dome
- Full Body
- Bullet
- Vandal Proof
- Low Light
- Digital / IP
- Analogue
- Remote Monitoring

## ABT Security Systems Integrated Systems Model

### With ABT Security Systems you can expect the best.

ABT Security Systems are early adopters of world's best practice in security design and technology.

From perimeter monitoring, to front-of-house, to internal access control you'll be surprised at how clever an integrated security system from ABT Security Systems can be.

Whether you are a multi-million dollar enterprise or a sole trader – we offer the same care and attention to detail no matter what size organisation you are.
