Cloud-based Facial Recognition by ABTSecurity

- REDUCED CORPORATE RISK
- IMPROVED PUBLIC SAFETY
- **ENHANCED MEMBER EXPERIENCE**
- DRIVE INCREASED REVE-NUE/REDUCE COSTS

For entertainment venues, Facial Recognition is an improved method that helps venue owners identify the ever-growing list of their regular and self-excluded patrons. This software also benefits security staff as they can be notified in real-time via mobile alerts of banned patrons, allowing them to take action earlier and in a far more discrete manner.

ABT Security Systems implements NEC NeoFace® recongnition software, which is the fastest and most accurate facial recognition software in the market. Features inloude real-time video surveillance, off-line video face search and high volume photo face search. It can be easily integrated with your existing security systems. We will be demonstrating how the **Biometric Facial Recognition Security Software** works at our stand.

We hope that while you are at the expo, you will take a moment to visit us on the **Stand No. 932, HALL 4**, and have a chat with the ABT security team.

If you would like any further information or to book a time for an exclusive discussion with one of our consultants please contact either Cherie or Denis on the below details:
