ABT TESA
Mobile Timesheets,
Expense & Approval app for
Web, iOS™ & Android™

## Simplified way to manage and approve timesheets and expenses

A simplified way to manage and approve timesheets and expenses

With the simple touch and an easy-to-use interface, The TESA web and mobile app makes timesheet creations, submissions and approvals convenient and easy.

No more missed expense claims or not knowing what's happening with your expenses. Add receipts and even create your expenses from receipts.

Whether you are in an office, or at a client site, it shortens the turnaround time frames with an app on the go that will keep track of all approvals for expenditure and timesheets in the palm of your hand!

Save time on the go.

Mobile Access for iOS & android

Save time on the go with ABT TESA

ABT mTime&Expense automatically increases your staff efficiency by providing 24/7 access to accurately log their times and expenses on the road. Available for Android™ and iOS™, it streamlines time and expenditure collection as well as providing workflow for approval.

Fully integrated

Integrated with Pronto and can be used with any other 3rd Party system

Expense reports & approvals

Group multiple expense records and submit for approval or setup recurring expense reports

Improve efficiency

Customised templates for expenses, such as log book, accommodation and flights; Auto-Create expense from attachment

Real time synchronisation

Ability to accurately track project costs

Use online or offline

Ability to use offline when out of service range and upload once back online

Attachments

Fully support different types of documents
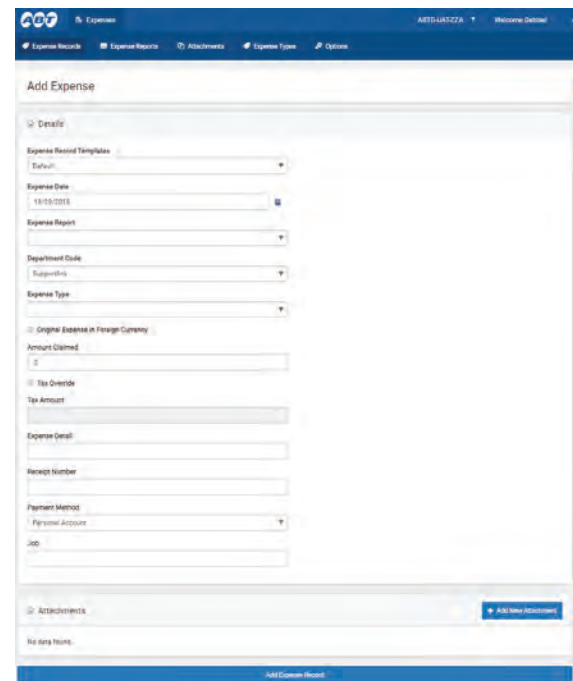

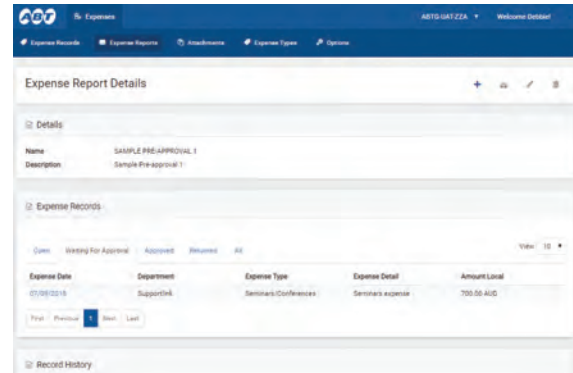

Simplify working processes

Aids in simplifying payroll and client invoices; pre-approval of expenses to automate approval processes

Keep you connected

24/7 access to track enquiries on projects and service calls, and log your times and expenses on the road

Responsive Web Interface

No more manual timesheets and paperwork!
