ABT mPOS
Mobile Point of Sale
for iOS™ & Android™

Roam, engage and transact, anywhere in-store

ABT

abtgroup.com.au

Integrate mPOS with Pronto Xi

mPos is one of the ABT mobile solutions designed specifically for the retail sector. It is secure, efficient and cost effective to any retail business and will fully integrate with your ERP system.

With total integration into your ERP system, your sales staff will have the freedom to roam, engage customers, and process transactions on the spot.

The extensive functionality of ABT mPOS for Android goes a long way to combat 'showrooming' where customers examine products in-store whilst simultaneously browsing on their mobiles to compare prices online.

An easy to use app that allows you to track sales, inventory, customer demands, customer trends, discounts, and report on these accurately, all in one simple app space that you can access from the office or your home.

Better in store experience, more margin protection
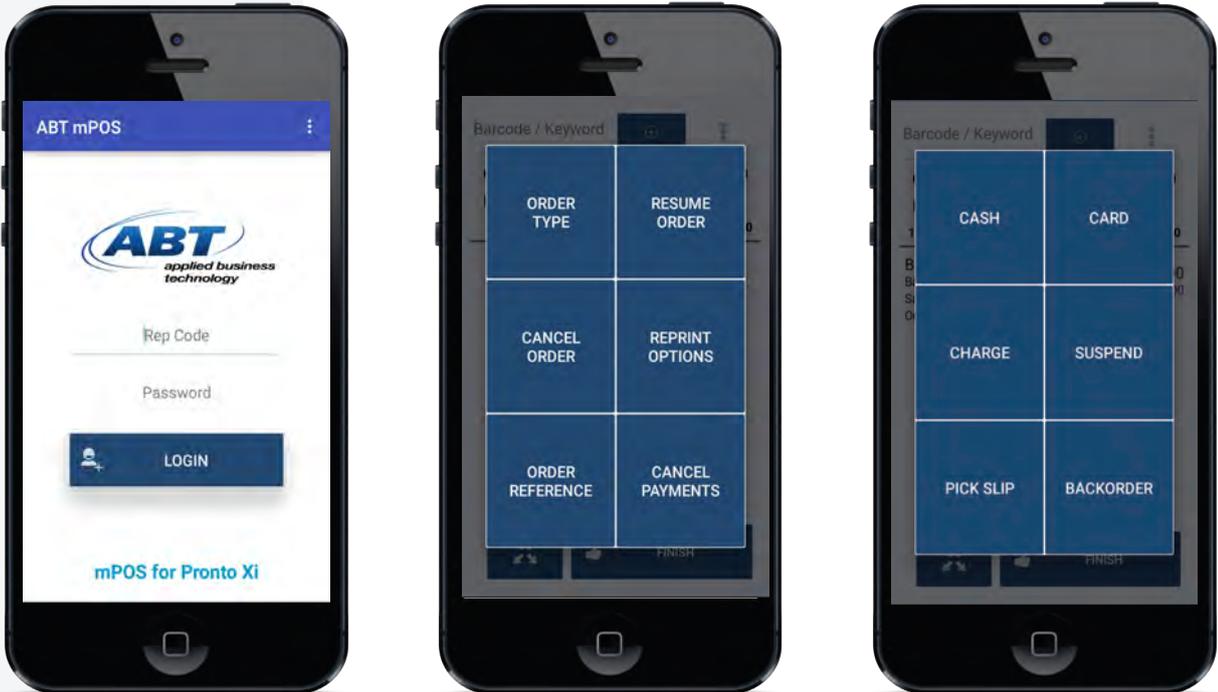

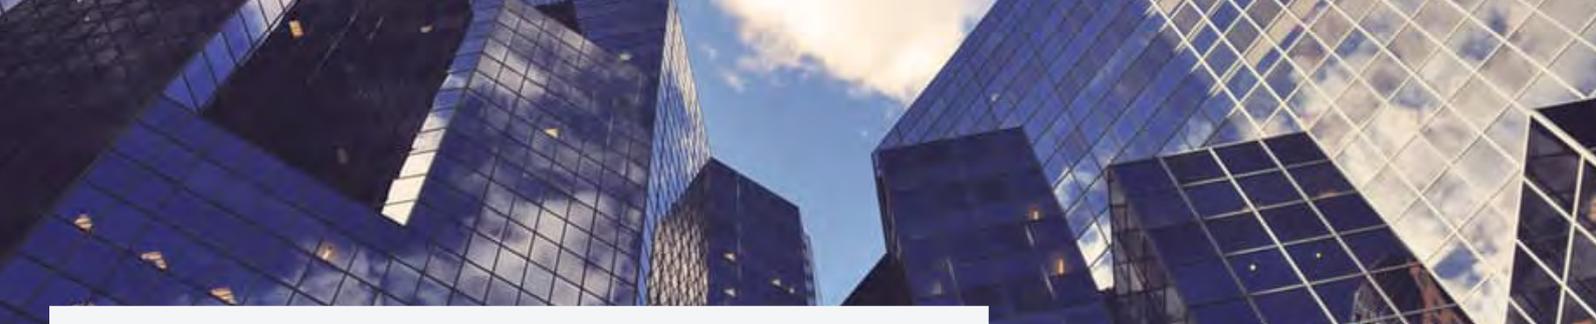

Transfer your retail store with ABT mPOS

Transfer your retail operation into a more efficient and effective digital world and equip all employees with unique mobile tools to deliver outstanding service and sales performance using a fully mobile, flexible and secure ABT mPOS.
