ABT mStocktake
Mobile Stocktake for Android™

# Reduce costs and increase accuracy

Integrate your inventory data capture solution with Pronto Xi

Fully integrated with your Pronto system, ABT mStocktake is an offline mobile application which allows users to enter their stocktake counts and then wirelessly upload them to Pronto. It provides you with powerful, innovative and easy to use tools and reports that can be accessed from anywhere.

Simply install and configure in your available mobile device, this is the most cost effective mobile solution for all retailers. It significantly reduces your time in performing stocktakes and increases inventory accuracy.

It supports both serialised stocktake and lot tracked items including entering of best before dates against lots. The app also allows the user to view, add or modify stock images in Pronto.

Save time on the go.

Reduce stock count cycle time and optimize your data capture processes

Manage stocktake, inventory count, stock valuation and other inventory data capture tasks remotely. ABT mStocktake provides you with powerful, innovative and easy to use tools and reports that can be accessed from anywhere.
