Consistent data grid user experience

Pronto Xi administrators are able to set up data grid views that complement and support business processes.

These views can be easily replicated for other users – ensuring a consistent and productive Pronto Xi user experience for everyone.

Secure file system setup

Selected whitelisted users can now be granted access to the Pronto Xi file system. Addition of these users is

completed via the module functions – making it convenient to configure and maintain.

Creating a list of users to grant access to the Pronto Xi file system

New IBM Cognos Analytics reports

A fresh set of out-of-the-box reports have been added with this release including:

Dynamic statement of financial performance

Users can access insights on any selected GL hierarchy and drill-down to details via this fully interactive report.

Fixed assets status

Assets that have been entered, but not updated to the register can now be reviewed beforehand. This reduces input errors and ensures the assets are appropriately capitalised.

Sales by customer

Keep accurate track of the best and worst performing products with the ability to apply filters to focus on the figures that matter the most.

Calendar synchronisation to CRM

When a user, such as a sales representative, deletes a calendar entry in their external calendar application, this action will now be

synced to Pronto Xi. The feature is compatible with Microsoft Exchange, Office 365 and Google.

Print gift receipts

Pronto Xi Point of Sale (POS) users are now able to print pre-configured gift receipts at the completion of a sale.

The search criteria has also been enhanced with additional parameters to fine-tune search results.

Adding macros to the grid maintenance screen

Add email address to a POS skin

POS admins are able to add the email address of a customer to a POS skin, if the customer is selected for the current sale. This change

complements the existing capability to show additional details about the customer, such as their name, phone number and more.

Save and exit a resumed backorder

Pronto Xi POS users can now exit a resumed backorder without the need to go through a payment cycle.
