Pronto Xi TrueForm Neo 3.2

This release contains key major improvements around TrueForm Neo windows service which provides improved visualisation of the service. In addition, the release delivers a new backup and restore facility which supports effective systems management.

Backup Procedures
Restore Procedures

A new backup and restore facility which can be effectively used for recovery.

New Logging Interface.

Please note that since the update, further developments have been made so we highly recommend upgrading to the latest version, Pronto Xi TrueForm Neo 3.2.1.

Payroll & Resources

Family Domestic Leave (FDL)

Family Domestic Leave is available as a tracked leave type in line with legislation changes. Employers will have the ability to set masking rules for FDL in terms of how it is represented on payslips and within the Employee Portal. Payroll Officers can view FDL entitlement for an employee on the employee master screen similar to other existing leave types.

These changes have been patched to lower versions of Pronto Xi being versions 730 to 770.3.

Retail

Promotions and Pricing Engine

The Promotions and Pricing Engine is a powerful tool designed to streamline the management of promotions and pricing for your business.

The new user experience and user interface features responsive design, with dynamic form entry and intuitive workflows that change based on the offer you choose. The engine's creation workflows take you through all the necessary screens to create the rule or offer based on the type selected. The new management screen allows you to manage all pricing and promotions easily. Customer pricing functionality is available, working seamlessly with your offers and providing greater flexibility to control exclusivity when multiple rules apply. The engine now includes new filter criteria, allowing you to select the criteria and values you need, with an upload facility for item/price promotions.

The new engine is compatible with the POS app and is available offline. APIs are also available for eCommerce, providing price consistency and all the functionality of the full engine.

Dynamic Form Entry

The Pronto Xi Promotions and Pricing Engine now has new intuitive workflows. The dynamic entry form will adapt to the promotions or pricing entered, simplifying the process.

Management Screen

All promotions and pricing can now be managed from one screen. With datagrid filters in place, current active offers can be seen without needing to check special pricing or external spreadsheets. All data can be filtered from one screen.

New offer types

New offer types have now been added into Pronto Xi Promotions and Pricing Engine including advanced BOGO and multibuy.

Price Rules

Multiple Prices can be added so that customers can receive different pricing – with no need to manually enter or re-enter data. The rules only need to be set up in the engine once, simplifying the buying process for customers and staff.

eCommerce API

The Promotions and Pricing Engine updates and changes can link to any third party or eCommerce platform via newly built APIs.

Pronto POS app

The updates to the Promotions and Pricing Engine are also supported in the Pronto POS app. This capability allows users to run the app offline but still have all updated pricing information made readily available.

New filter criteria

This new filter allows users to select different criteria and values for pricing, while including an upload facility. For example, users can include the filter 'brand' and select only the specific brands to include in the promotion.

We are an Australian developer of award winning business management and analytics solutions. Pronto Xi, our Enterprise Resource Planning (ERP) software, integrates accounting, operational and mobile features in a single system - optimising business processes and unlocking actionable insights. That's why for more than 40 years, over 1,500 Australian and global organisations, across a wide range of industries, have trusted Pronto Xi to simplify their most complex challenges.

With headquarters and our Development Centre located in Melbourne, we have support offices and consultants based across Australia, as well as a global network of Resellers and Solution Partners. Specialised business units within Pronto Software have the expertise to assist you with pivotal technology -Digital Transformation with Pronto Woven, Cloud and Hosting services with Pronto Cloud and Business Intelligence solutions with Pronto iQ.

When you choose Pronto Software, you gain a team with deep industry experience, giving us the ability to understand your specific needs and build innovative solutions that drive business growth and revenue.
